

Call for Tool Sponsors

Having launched the first in the suite of **Green Star SA environmental rating tools for buildings (Office v1)**, the GBCSA now turns it's tool development program to **other building types**.

General feedback to the Council seems to indicate that the following tools are most urgently sought by the industry:

- ▶ Existing Building Tool (Operations & Maintenance)
- ▶ Multi-Unit Residential
- ▶ Retail
- ▶ Hotel

The **order** in which future tools are developed will **depend on market demand**, which is gauged and demonstrated via the **availability of tool sponsorship funding**. Tools will be sponsored by a combination of **Principal and Associate sponsors** and development will commence once adequate funding is in place.

To this end, the Green Building Council now calls on all companies with an interest in seeing a specific tool developed to **contact us for more details** on tool sponsorship. Please email info@gbcsa.org.za to register your interest and indicate on your correspondence which particular tool your organisation is interested in sponsoring.
