10 Year Commemorative Publication

10 YEARS OF INSPIRING BETTER BUILDINGS

10

This year the Green Building Council of South Africa celebrates 10 years of operation in service of the South African property and construction sector in 2017, and reaches the bench mark of 250 certified buildings.

In celebration on these milestones and the acts of leadership and innovation on the part of its members, the GBCSA has commissioned a commemorative publication for release at the Green Building Convention in October 2017.

Introducing 10 Years of Inspiring Better Buildings: the official commemorative publication of the GBCSA, documents the achievements, celebrates the innovative genius of the designers, and acknowledges leadership shown by GBCSA members as they embraced the ideals of green buildings and set about investing in, commissioning, designing, operating, and occupying some of the greenest buildings in the world.

Published to the highest and greenest specifications, the publication will seek to contextualise the first 10 years of the green building movement in South Africa through story telling and beautiful imagery.

GBCSA members and stakeholders are invited to participate in this publication by becoming sponsors, taking up advertising space, or by simply purchasing additional copies for your organisation and/or clients.
